Education

Georgia Gwinnett College *Lawrenceville, GA*

Bachelor of Science in Information Technology *Aug 2022 – May 2026*

Experience

PUREJOIN Inc. | Information Technology Technical Support *Duluth, GA*

Software Testing & QA, Analytical Problem-Solving, Adaptability *Mar 2026 – July 2026*

- Provided technical support and troubleshooting for customers experiencing POS software, barcode scanner, receipt printer, payment terminal, and web application issues, diagnosing hardware/software problems guiding users through resolutions
- Performed functional, integration, and end-to-end testing across POS applications, web platforms, and connected hardware; identified, reproduced, debugged, and validated software issues to improve system functionality and reliability
- Contributed to web and mobile application development using PHP, Laravel, Flutter/Dart, SQL, and APIs, implementing database-driven features and working with test environments containing 20,000+ user and company records

Holy Vietnamese Martyr Church | Youth Catholic Leader *Norcross, GA*

Team Leadership, Problem Solving, Adaptability *Aug 2010 – May 2022*

- Assist in preparation and setting up large events spanning multiple days with upper-level management
- Collaborate and communicate with team members to run extracurricular activities
- Interact and work with the community to foster support for the organization

Projects

PUREJOIN Inc. | Event Management Website *Duluth, GA*

PHP/Laravel Development, SQL & Database Integration, Web Application Development *May 2026 – July 2026*

- Developed full-stack-features for an event management web application using PHP, Laravel, Blade, and SQL, including Laravel-based user authentication and session management, event history, and date-range filtering
- Build a host approval workflow enabling hosts to accept or decline vendor and merchant requests, writing SQL queries to retrieve application data and persist changes in the database
- Configured database connectivity and tested/debugged application functionality against 20,000+ test records, including 10,000+ users and 10,000+ companies, while collaborating with senior IT staff and technical team members

PUREJOIN Inc. | PUREJOIN POS V3 Ecosystem Testing *Duluth, GA*

Software Testing & QA, Integration Testing, Debugging & Troubleshooting *May 2026 – July 2026*

- Conducted functional, integration, and end-to-end testing across 3 interconnected retail systems – POS, customer rewards display, and inventory management platform – to identify, reproduce, and troubleshoot software issues
- Validated critical POS workflows and hardware integrations, including barcode scanning, checkout, payment processing, receipt printers, card terminals, customer rewards, and cross-device communication
- Tested web-based inventory an store management functionality, including customer accounts, inventory, purchase orders, employee management, and device connectivity, verifying system behavior and reliability across user workflows

GGC & Next Generation Focus | Dashboard Designment Project *Lawrenceville, GA*

JavaScript, React.js, MongoDB, git, GitHub *Aug 2025 – Dec 2025*

- Redesigned and enhanced a nonprofit staff management dashboard using React and JavaScript, developing dynamic UI functionality to streamline staff workflows and improve usability
- Developed a certification management system enabling staff to upload, view, and sort PDF documents, and integrated MongoDB to securely store, retrieve, and manage application data
- Collaborated with a 4-person development team on architecture, feature planning, and code reviews while leading client meetings with the nonprofit founder to gather requirements and translate business needs into functional technical solutions

Skills

Programming Languages: Java, Python, JavaScript, PHP, Dart

Frameworks & Databases: React.js, SQL, MongoDB, Laravel, Blade, Flutter

Certifications: OpenAI Applied AI Foundations, Anthropic AI Fluency: Framework & Foundations

Tools: git, GitHub
